

LED Lens Solutions

Are your new LED lights too bright?
Does your LED retrofit kit show diodes?
We have your LED lens solutions for light transmission, diffusion, and concealing diodes that are unsightly or too intense.

S80A24

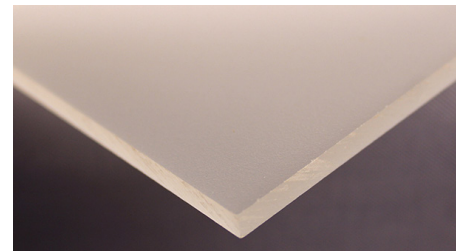

Our standard white acrylic LED lens. This soft white diffuser is smooth on one side and has a mechanical texture to eliminate reflection on the other.

- light transmission: 60%
- 2' x 4' nominal grid (23 ¾" x 47 ¾")
- .080" thick

**S80A24FROST**

A clear frosted acrylic lens. Provides the same light transmission as a clear prismatic lens while softening and diffusing harsh LED lights.

- light transmission: 95%
- 2' x 4' nominal grid (23 ¾" x 47 ¾")
- .080" thick

**FLEXILUME**

A thin, flexible, white acrylic overlay. Place on top of an existing clear lens or louver to soften and diffuse harsh LED lights.

- light transmission: 62%
- 2' x 4' nominal grid (23 ¾" x 47 ¾")
- .020" thick

**LD Series Globes**

These frosted acrylic globes are specifically designed to diffuse LED diodes. Ideal for outdoor lighting applications such as street lights and lamp posts.

- light transmission: 90-94%
- 6" to 20" diameter sizes available.
- Lip fitter neck or neckless mounting styles available.
